Audio for Video

Softie Windshield & InVision Lyre Mounts

The **Softie Windshield** is a slip-on, cavity foam windshield with integral fur cover. Designed to offer up to 40dB (100Hz)* wind-noise attenuation with very little high-frequency loss, the Softie has now become a world-wide standard in the broadcast industry.

The **Softie Lyre Mount with Camera Clamp Adaptor (CCA)** allows you to attach a shotgun or rifle microphone to camcorders fitted with a microphone clamp (25 to 27mm diameter) or a boom-pole with 3/8" thread.

The new **Softie Lyre Mount with Microphone Holder Replacement (MHR)** replaces built-in or accessory camera mounts or clamps, and is supplied with three sets of metric screws (20mm-long M2.5, M3 and M4 types), allowing the mount to be connected directly to many common camcorders.

Lyre Mount	Part no.
InVision Softie Lyre Mount CCA	037306
InVision Softie Lyre Mount MHR	037324

InVision Video

InVision Video Mount is a versatile microphone shockmount for use with video cameras, camcorders, booms and mic stands.

A lightweight, durable clamp holds the microphone in place, and is itself suspended in two W-shaped patented Lyre mounts, which provide substantially better isolation from camera motor and drive noise and vibrations than traditional on-camera microphone mounts.

InVision Video	Part no.	Suitable for
InVision Video (Hot Shoe)	042901	Mics from 19 - 25mm in diameter

Cable with Tac!T Filter

All microphones suffer wind and handling noise, but shaping the low frequency response is a brilliant way to keep things quieter. If your camera or recorder doesn't have a way to do that, then the Rycote **Tac!T** offers the ideal solution. The **Tac!T** is suitable for any phantom-powered microphone, connects at the XLR, powers itself, and cuts unwanted noise while leaving normal speech and sound untouched. It's like a "magic" mic cable!

Wireless Receiver Camera Bracket

The Rycote **Wireless Receiver Camera Bracket MkII** is a universal wireless microphone receiver holder used to mount receivers onto a 1/4" mount or flash shoe on any camera.

The bracket features a brass thumbwheel which makes secure mounting easier as well as larger overall dimensions to improve compatibility with receivers. As with the Mk I it has 4 soft grip pads and hook-&-loop straps for securing receivers in place. A shoe mount is included.

Solutions for Lavalier Microphones

Rycote has an extensive range of solutions for Lavalier Microphones from the Lavalier Windjammer, the most heavy-duty of the Rycote windshields for personal microphones, to the well known range of Stickies, Undercovers and Overcovers.

For more information please visit www.rycote.com

Portable Recorder Solutions

The solution developed for **Portable Recorder** includes: a Lyre-based suspension for excellent isolation against vibrations, a Mini Windjammer offering up to 12dB wind-noise attenuation, and an Extension Handle to allow for comfortable hand-held use.

The Lyre-based suspension for portable recorders has been designed to offer excellent isolation from vibrations, shocks and handling noise.
