

Power your camera, your headlight, charge your cell phone, your tablet and record your film on an external recorder.

All with only one power source!!

#### Power Supply System:

Input voltage:	10V-19V DC via V-Mount
<i>alternative:</i>	10V-19V DC via AB-Mount
Output voltage, unregulated:	10V-19V DC via D-Tap / Hirose
Output voltage, regulated:	7,5V DC / 8,6V DC via Hirose 5V DC / 2A via USB type 2
max. current, unregulated:	6A total
max. current, regulated:	socket 1                      3A socket 2+3 together 3A

#### Connections:

USB type 2                      output

D-Tap 2pin                      output

Hirose 6pin socket (3x)

- 7,5V switchable for handheld camcorder
- 8,6V switchable for DSLR cameras
- 14,4V for camera, recorder, head lights, etc.
- 15mm rod mount
- V-Mount adaptor (alternative Anton Bauer mount on request.)

#### Optional accessories:

Diver mounting brackets for 15mm rods  
Different cable for most actual camera systems

#### Scope of delivery:

1x **Virtus Power**

1x **Virtus rb 15** rod bracket for 15mm rods

**Dimensions:** 16,5 x 11 x 4 cm (6,3" x 4,3" x 1,57")

**Weight:** approx. 450g

# Virtus Power

Flexible. Constantly. Simultaneous.

## Virtus Power

**Virtus Power** offers several options on a movie set.

With professional interfaces many electronically devices can be powered with only one power source. Support your camera, your headlight, charge your cell phone, your tablet and record your film on an external recorder. All this with only one power source

Energized with a V-mount adaptor or alternatively an Anton Bauer mount, with an input voltage of 10-19 Volt, **Virtus Power** allows you to support different components with different operating voltages.

Three 6-pin *Hirose* sockets can release either 7,5VDC or 8,6VDC as constant electric tension. A direct voltage loop of the complete 14,4V DC up to 19VDC is possible as well. Every *Hirose* sockets has a *bayonet connector* witch to prevent unintended release of the cable.

**Virtus Power** has a 2pin D-tap output witch guarantees compatibility with most camera accessories.

With a *USB type2* output **Virtus Power** can charge a cell phone or tablet while recording. During long period movie shoots with f.e. an iPad based teleprompter this extra power supply is.

The different operating voltages of **Virtus Power** will exclusively regulated by high efficiently DC/DC - converter. This allows that 100% power of the battery is reaching the point of need. Evolution of heat, as known from conventionally DC/DC converters, thus is avoided.

The complete **Virtus Power** housing is machined from a block of aluminium and guarantees therefore long life circle, stability and reliability. Even so the weight incl. mount is only 450 grams

**Virtus Power** is the first of a serial production of intelligent and professional solutions for the daily in-field-use from **ACSE GmbH, Munich – Germany.**

Very soon **Virtus Power** can be upgraded with a attachable HDMI to SDI converter. Therefore please follow us on [facebook.com/virtus.systems](https://www.facebook.com/virtus.systems) or [www.acse-gmbh.de](http://www.acse-gmbh.de)
